

Metalink Company Profile

Metalink Ltd. (NASDAQ: MTLK) is a leading provider of silicon solutions for high performance wireless and wireline broadband communications. Metalink's products revolutionize the broadband experience by facilitating the convergence of telecommunication, networking and entertainment. Based on WLAN and DSL technologies, these products are designed to offer true broadband connectivity in every home.

Metalink's wireless LAN products introduce an enhanced wireless home network experience by implementing *WLANPlus*[™], a high-throughput IEEE 802.11n-compliant wireless LAN technology. *WLANPlus* surpasses existing wireless LAN 802.11a/b/g technologies by an order of magnitude, providing a best-of-breed foundation for wireless triple-play and entertainment networks with multiple simultaneous high-definition video streams and extended coverage. With a wide range of chipsets including single-band, dual-band, simultaneous dual-band and System on Chip (SoC) with integrated network processor, it offers the best match for various applications ranging from Residential Gateways, Access Points and Routers to PC cards, STBs, DMAs and wireless HDTVs.

With transmission speeds reaching 300 Mbps, *WLANPlus* provides a cutting edge solution for VoIP, gaming and HD video streaming applications, with complete and reliable coverage throughout the home. The *WLANPlus* chipset includes MIMO technology, featuring advanced coding (LDPC), Maximum Likelihood MIMO detector, market-leading 2.4/5 GHz performance, and packet aggregation with channel bonding. The *WLANPlus* family of products supports a full suite of 802.11n applications.

Metalink also offers a broad range of symmetric DSL and VDSL products used by operators as a cost-effective network upgrade to support triple-play services. Millions of DSL lines have already been deployed by the largest service providers in Europe, North America and Asia Pacific using Metalink-based quality products, which have been integrated into the equipment of leading system manufacturers.

Headquartered in Yakum, Israel, the company has design centers in USA (Atlanta, GA) and Taiwan, and sales offices in USA (Atlanta, GA), South Korea, Japan, China and Taiwan. Metalink has been certified to the latest revision [2000] of the ISO9001 International Standard.
